

# Kshitiz Bhurtel

Kathmandu, Nepal • +977-9806766171 • [kshitizbhurtel@gmail.com](mailto:kshitizbhurtel@gmail.com) • [Linkedin](#) • [Portfolio](#)

Experienced Software Engineer with 4 years of expertise in full-stack development. Skilled in Spring Boot, Django, and React with a focus on optimizing system performance and enhancing data security.

## Professional Experience

SOFTWARE ENGINEER II | HASHEDIN BY DELOITTE | MAR 2022 - MAY 2025

- Developed a cybersecurity benchmarking application used by 40+ organizations to assess maturity levels, identify threats, analyze gaps, and recommend risk mitigation measures, improving security posture by 27%.
- Built a **CARLA-based synthetic data pipeline** generating **100K+ images** with segmentation, LiDAR, and RADAR data, reducing data collection costs by **~80%**.
- Automated dataset generation and processing using **AWS and Jenkins**, reducing manual effort by **75%** and optimizing 2D bounding-box processing from **20s to 1s**.
- Developed and tested **real-time crash scenarios** against the Autoware AD Stack, identifying **12% more edge cases** for safety validation.

SOFTWARE ENGINEER II | TECHCO LAB PVT LTD | AUG 2026 - PRESENT

- Developed **RiskAI**, an LLM-powered risk assessment application for analyzing and evaluating disaster-related risks.
- Integrated **Model Context Protocol (MCP) tools** with LLM-based agents, enabling specialized agents such as **HeatAI and FloodAI** to analyze historical and upcoming disaster events.
- Designed agent-based workflows to combine **LLM reasoning with external tools and data sources**, improving the application's ability to generate context-aware risk insights.

## Contract Experience

FULL STACK DEVELOPER | OCT 2024 – AUG 2026

- Designed and developed a **crypto-powered postage purchasing platform**, enabling users to seamlessly buy postage labels using cryptocurrencies from **USPS, UPS and FEDEX**
- Replaced a third-party payment verification system with a custom-built BTC, ETH, XMR, and XRP validator, reducing transaction verification time by 60% and cutting third-party costs by 100%.

## Skills

Java • Python • JavaScript • React • Spring Boot • Django • REST APIs • PostgreSQL • MongoDB • DB2 • AWS (S3, EC2, Lambda, RDS, EKS) • Jenkins • WebSockets • OpenCV • Carla Simulation • Autoware • Microservices • Cloud Computing • Computer Vision

## Education

AUG 2018 – AUG 2022

BE in Computer Science | New Horizon College of Engineering | Bangalore, India

## Activities

Reading • Doodling • Exploring new tech trends
